

Terry Galliard Award:

At each ISPL meeting, the international plant lipid researcher community recognizes the career achievements of a distinguished plant lipid scientist, through the presentation of the Terry Galliard Award. This award is in honor of Terry Galliard who established the ISPL conference back in 1974. Nominations are now being accepted for the Terry Galliard Award/Medal. Persons interested in submitting a nomination package are asked to contact Dr. Ikuo Nishida (Saitama University, nishida@mail.saitama-u.ac.jp) by **March 15**. The ISPL2018 Scientific Advisory Committee will be responsible for reviewing the nominations. Please note that all nominators will remain anonymous. The awardee will have the opportunity to give an oral presentation as part of the conference program.

A List of Terry Galliard Medal Laureates and Lecture Titles in the past symposia

1994*	Norio Murata (Okazaki) The cyanobacterial desaturases: aspects of their structure and regulation.
1996*	John Shanklin (Upton, NY) Structure-function studies on desaturases and related hydrocarbon hydroxylases.
1998*	John L. Harwood (Cardiff) Life and stress: a plant's standpoint.
2000*	John Ohlrogge (East Lansing) Fatty acid synthesis: from CO ₂ to functional genomics.
2002*	Ernst Heinz (Hamburg) Sterol glucosides and ceramide glucosides: cloning of enzymes contributing to their biosynthesis.
2004*	Hartmut Lichtenthaler

	(Karlsruhe) Evolution of carotenoid and isoprenoid lipid biosynthesis in photosynthetic and non-photosynthetic organisms.
2006	John Browse (Pullman) Jasmonate signaling and stamen development
2008	Sten Stymne (Alnarp) Fresh oil instead of fossil - challenges and opportunities for plant lipid science
2010	Christoph Benning (East Lansing) Lipid metabolism and trafficking during chloroplast development and maintenance.
2012	Ivo Feussner (Göttingen) Conserved functions of oxylipins in flowering and non-flowering plants.
2014	Ljerka Kunst (British Columbia) New insights into biosynthesis and deposition of cuticular wax.
2016	Edgar Cahoon (Nebraska) Unusual fatty acid metabolism: Learning from the less common.
