

【Track3】 Analysis and Evaluation of ATF Behavior and Performance

- **Experimental Analysis with FEMAXI-8.1 on Fuel Performance of Cr-coated Zircaloy Cladding with UO₂**

Ria Mishima(Japan Atomic Energy Agency),Noriko Shirasu(Japan Atomic Energy Agency),Afifa Mohamad(Japan Atomic Energy Agency),Shuhei Miwa(Japan Atomic Energy Agency),Shinichiro Yamashita(Japan Atomic Energy Agency),Yoshiyuki Kaji(Japan Atomic Energy Agency),Yuji Okada(Mitsubishi Heavy Industries, Ltd.),Daiki Sato(Mitsubishi Heavy Industries, Ltd.),Robert Hansen(Idaho National Laboratory),David W Kamerman(Idaho National Laboratory)

- **Comparative Study on a Design Basis Accident Analysis for a Zircaloy-based Fuel and Accident Tolerant Fuel Using MARS-KS Code**

Ju Yeop Park(Korea Institute of Nuclear Safety),Changhwan Shin(Korea Atomic Energy Research Institute),Yongsik Yang(Korea Atomic Energy Research Institute)

- **FEMAXI-ATF Fuel Performance Analysis on Dual-layered SiC Cladded Fuel Involving PCMI During Normal Operation**

Yamato Oikawa(Waseda University),Akifumi Yamaji(Waseda University),Yoshiyuki Nemoto(Japan Atomic Energy Agency),Shinichiro Yamashita(Japan Atomic Energy Agency)
