

【Track7】 TRISO Irradiation & FP Behavior

Proposal for Optimising the Evaluation of Amoeba Effect in High-Temperature Gas-cooled Reactor Fuel

Masaki Yoshino

Japan Atomic Energy Agency

Matrix-Integrated Aluminosilicate Cs Getter for HTGR Fuel Forms without TRISO Particle Redesign

Koei Sasaki

Japan Atomic Energy Agency

Kernel Porosity of Irradiated AGR-2 TRISO Fuel

Harvey Ling

University of New South Wales

Molecular Dynamics Simulation of Ag Diffusion in the SiC Coating of TRISO Fuel Particles Based on Machine Learning Potentials

Jiaxuan Liu

Harbin Engineering University
