

【Track7】 Fast Reactor Structures & Materials

Development Status of an In-House Core Assembly Bowing Analysis Code for the Korean Small Modular Sodium-Cooled Fast Reactor

Heungsoo Lee

Korea Atomic Energy Research Institute

Quantification of Spectrum Effects in HT-9 Steel using Microstructures from Multiple Fast Reactor and Thermal Reactor Test Facilities

Stephen Taller

Oak Ridge National Laboratory

Characterization of Advanced Cladding Candidate Materials for Irradiation in the High Flux Isotope Reactor

Caleb Patrick Massey

Oak Ridge National Laboratory

Efficient calculations of sensitivity coefficients to fuel swelling in Monte Carlo k-eigenvalue simulations

Theophile Bonnet

University of Cambridge
