

【Track3】 Mechanical and Thermal Characterization for ATF Cladding

Mandrel Ductility Tests with ATF Claddings

Márton Király

HUN-REN Centre for Energy Research

Temperature-Dependent Cracking Mechanisms of the Chromium Coating Layer on Zircaloy Cladding under Multiaxial Stress

Hyuntaek Rho

Seoul National University

In-situ Observation System for Tensile Fracture Behavior of Cr Coating on Zircaloy-4 under High Temperature using Three-Point Bending Test

Koichi Ogata

MHI Nuclear Development Corporation
