

【Track5】 Several Fuels and Failure Modes

Fuel Rod Cladding Impact on Time at Temperature at Post-CHF Conditions Based on Single Rod Thermal Hydraulic Testing for Uncoated and Cr-coated Zr Cladding

Zeses E Karoutas

Westinghouse Electric Company

Evaluation of Uniform Elongation for Hydrogen-Based Transient Cladding Strain Limit

Guirong Pan

Westinghouse Electric Company

A fracture prediction methodology for cladding tube in bending conditions from metallography analysis

S  verine Guilbert

ASNR

Iodine-Induced Stress Corrosion Cracking of Zr-1%Nb Fuel Cladding

Mi Wang

Studsvik Nuclear AB

Investigating Cladding Performance beyond the Critical Heat Flux through Rapid Thermal Transients

Mackenzie Ridley

Oak Ridge National Laboratory
