

【Track2】 Advanced Cladding Materials

NEA Second Framework for Irradiation Experiments FIDES-II: progress of the Framework and future prospects

Ville Tulkki

Nuclear Energy Agency

Neutron irradiation and post-irradiation examinations of SiC-based composite materials for the development of accident-tolerant LWR fuel cladding

Takaaki Koyanagi

Oak Ridge National Laboratory

In situ micromechanical investigation of mechanically loaded SiC/SiC cladding

Spencer Doran

Oregon State University

Nitride Dispersion Strengthened FeCrAl alloy during Laser Powder Bed Fusion for the Accident Tolerant Fuel Cladding Materials

Jung-Wook Cho

Pohang University of Science and Technology
